

Naitik Chitransh

Software Engineer | MERN Stack Developer

+91-7275414177 | naitikchs16@gmail.com | Portfolio | GitHub | LinkedIn | LeetCode

Professional Summary

Final-year Computer Science student and Full Stack Developer specializing in MERN-based, AI-powered, and real-time applications. Experienced in REST API design, authentication, database modeling, and LLM integrations, with a strong foundation in DSA, OOP, and system design. Targeting Software Engineer / SDE roles.

Education

Jaypee University of Engineering and Technology
B.Tech. in Computer Science and Engineering / CGPA: 8.0

2023 – 2027
Guna, India

Technical Skills

Languages: JavaScript, TypeScript, Python, C, C++, HTML5, CSS3

Frontend: React.js, React 19, Next.js, Redux Toolkit, React Router, Tailwind CSS, SCSS, Vite, Responsive Design

Backend: Node.js, Express.js, REST APIs, Socket.IO, WebSockets, Middleware, API Integration

Databases: MongoDB, Mongoose, MySQL, Redis, Schema Design, Indexing, Data Modeling

AI / LLM: LangChain, LangGraph, Google Gemini, OpenRouter, Mistral AI, AI Agents, Tool Calling, RAG, Web Search, Prompt Engineering

Authentication / Security: JWT, HTTP-only Cookies, bcryptjs, RBAC, OTP, Email Verification, Zod, Helmet, CORS, Rate Limiting, Input Validation

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Tools / Deployment: Git, GitHub, Docker, Postman, VS Code, Render, Vercel, MongoDB Atlas, Nodemailer

Experience

Full-Stack Trainee – Apprenticeship
Sheryians Coding School

Ongoing
Bhopal, Madhya Pradesh

- Building full-stack applications with **JavaScript, React.js, Node.js, Express.js, MongoDB, REST APIs, and JWT authentication** in a production-oriented MERN environment, with a focus on responsive UI development.
- Developing and debugging frontend/backend features – API integration, database operations, state management, and error handling – while building reusable UI components.
- Applying **Git/GitHub, Postman, deployment workflows, and AI-assisted development** to streamline debugging, testing, and software delivery.

Projects

QueryMind – AI-Powered Context-Aware Research Assistant

GitHub | Live Demo

React 19 – Redux Toolkit – Node.js – Express 5 – MongoDB – Socket.IO – LangChain – LangGraph – Gemini – OpenRouter – Tavily

- Engineered a full-stack conversational AI research platform using **React 19, Node.js, Express, MongoDB, and Socket.IO**, enabling context-aware research with persistent conversations and real-time AI response streaming.
- Implemented a durable **memory and personalization layer** in MongoDB, resilient **multi-provider AI orchestration** (Gemini primary, OpenRouter/Mistral AI fallback), and **Tavily web search** integration for source-grounded, citation-backed responses.
- Implemented **JWT authentication with HTTP-only cookies, bcryptjs hashing, and email verification**, including human-in-the-loop email actions via Gmail REST API, Resend, and Nodemailer.

PulseClass – Real-Time Classroom Engagement Platform

GitHub | Live Demo

React 19 – Vite – Tailwind CSS – Node.js – Express – MongoDB – Mongoose – Socket.IO – JWT – Zod

- Built a real-time classroom engagement platform where instructors launch **anonymous polls** and view live response and participation analytics, powered by **Socket.IO WebSockets** for instant vote aggregation and real-time session updates.
- Designed a secure backend with **JWT authentication, HTTP-only cookies, RBAC, Zod validation, Helmet, CORS, rate limiting**, and centralized error handling.
- Modeled MongoDB/Mongoose schemas – **users, institutes, classrooms, sessions, polls, responses** – with compound indexing for duplicate-vote prevention, and delivered a keyboard-first instructor workflow with reusable poll templates and live analytics.

Achievements & Leadership

- Cummins India Scholar** – Selected for academic excellence with a full academic fee waiver.
- Sheryians Coding School Hackathons** – 2× Winner, building and presenting functional software solutions under time constraints.
- TEDx-JUET, Curation Team Head** – Led speaker curation, research, and event content planning.
- Competitive Programming** – Solved **200+ problems on LeetCode**.
